Denver *M218S* by Daniel Libeskind 2009

Things well-done are done together

At Olivari, labour is a company asset that implies maintaining elevated fabrication standards. It also signifies recognition of the merits and capabilities of each person.

On Friday afternoons at Olivari, the last hour of the shift is always dedicated to cleaning and reorganising each person's workstation. There have been no instructions from higher up to do so; no service order was emitted for a scheduled cleaning duty. It is a habit that grew over the years, a way to begin the new week in neat, clean conditions. Above all, it is the sign of a shared sentiment of belonging, a gesture of consideration and care that eloquently describes how the company is everybody's second home.

Of course Olivari has never stopped renewing and improving the workspace. It has invested in safe, high-quality surroundings besides simpler things such as regular coats of paint to keep all departments bright and spotless. When it was decided to offer employees a blue T-shirt in addition to the mandatory safety shoes, it became natural for everyone to wear it during work hours. The choice shows pride, team spirit and a form of casual elegance, as if the everyday crafting of beautiful objects had become part of the workers' spirit. They are aware of being both makers and members of this beauty.

Beauty and elegance issue daily from the skilled hands of those who meticulously apply invisible layers of glue, those who deftly wrap each new product in its final packaging from which it will emerge fresh, unblemished and fragrant. These objects often carry the name of an important person, a famous architect or successful designer, but they are born from the concerted attention lavished on them by many, day after day. It begins with experienced product and production managers who collaborate from the very first studies to solve problems and invent the best answers. Sometimes, their ideas are patented, consolidating authentic industrial values. Behind their grace, these seemingly simple objects conceal the rigour of the most absolute precision, a type of precision that even the most modern machinery cannot guarantee. Only a trained and watchful eye can ensure it by regulating, modifying and complying with the transformations of the materials and the wear of the equipment. Such experience is renewed from generation to generation: not infrequently, workers' sons take the place of their fathers.

So here we have it: at Olivari, labour is a true company asset that is not given in exchange for benign paternalism, but founded on solid reciprocal respect, based on the high standard of work that is required, and on the recognition of the merits and capacities of each person.

This is something to think about next time you take by the hand an Olivari door handle.

SuperInox_finishes

Guaranteed for up to **30 years** not to pit, rub, tarnish, fade or lose its lustre in sea air & high usage environments.

Too often we see door hardware tarnished by the ravages of time, constant usage, or corrosive sea air. SuperInox was specifically developed by Olivari of Italy to combat this problem. Now a door handle can look as good in 30 years as it did when it was first installed. Olivari believes that things should last; a lost art in todays disposable world.

Welcome to the world of SuperInox.

Vacuum metallisation (VM) is a high-end technology treatment process habitually employed for tools used in high-velocity steel machining. It is applied to products that have already been chromed in order to obtain maximum resistance to wear and tear.

In fact, VM - the SuperInox process - increases the surface hardness of the plated product to three times that of traditional chromium plating.

Since 2004 Olivari has been using this technology within its exclusive manufacturing facility located in Borgomanero, Italy. An additional benefit of the VM process is its ability to offer metallic colours that cannot be produced within the traditional galvanisation process.

VM coating has exceptional performance. in stability and longevity of the colour created, making the plated product last and last. When used in accordance with maintenance guidelines, SuperInox finished hardware in Brass, Satin Brass, Bright Nickel, Satin Nickel and Satin Stainless have a **30-year anti tarnish sea air guarantee**. Olivari SuperInox finished hardware in Satin Copper, Satin Bronze, and Anthracite have a **10-year anti tarnish sea air guarantee**.

GALVANIC FINISHING

Galvanisation of the brass handle gives it a protective metal coat of nickel-chromium to guard against wear and corrosion.

CR_Polished Chrome

The handle is protected by a layer of chrome, forming an excellent barrier against weathering and offering greater resistance to wear and tear. The bluish-silver colour and perfect shine make this finish particularly suitable for elegant settings. The finish has a **10-year anti tarnish sea air guarantee**.

SC_Satin Chrome

The handle is protected by a layer of chrome, forming an excellent barrier against weathering and offering great resistance to wear and tear. The satin finish lends the handle a pleasant tactile quality. The chromed reflections carry a formal connotation suggesting use in modern settings.
The finish has a **10-year anti tarnish sea air guarantee**.

EMB_Electro Matt Black

The handle has a layer of matt black chrome. The satin black finish lends the handle a sophisticated quality. The satin black colour carries a progresive connotation suggesting use in a modern setting.

Custom Bronze Waxed_

DBW - Bronze Dark Waxed,
MBW - Medium Bronze Waxed,
CBW - Copper Bronze Waxed

The handle has a layer of chemically treated bronze and wax, forming a living barrier against weathering. The rich bronze finish lends the handle a nostalgic look and feel. The bronze reflections carry an old-fashioned connotation suggesting use in traditional settings. As a living finish created within Australia, the bronze colour will change over time.

SUPERINOX FINISHING

With SuperInox; a polished or satin-finish chrome handle is coated with an additional layer of metal (superfinishing) under high vacuum. Vacuum metallisation is extremely hard and durable. Nanocomposites of metal, determine the specific colour of the surface and protect it from wear, scratches and aggressive substances such as humidity, sweat, salt spray, temperature swings and ultraviolet rays.

IB_SuperInox Brass

A practically eternal finish, Brass is known for its pleasing looks as well as its durability. With its rich tonality, the qualities of endurance and toughness reflect the quality of the Olivari SuperInox finish. The finish has a 30-year anti tarnish sea air guarantee.

ISB_SuperInox Satin Brass

SuperInox Satin Brass is a combination of the classical softness of satin brass, & the modernity of the SuperInox finish, produces a durable and consistent colour over time. The finish has a 30-year anti tarnish sea air guarantee.

IBN_SuperInox Bright Nickel

This bright and shiny finish has the warmth and elegant colour of nickel, the advantage of remaining unaltered over time, while not causing allergic reactions. Suitable for comfortable and sophisticated settings. The finish has a 30-year anti tarnish sea air guarantee.

ISN_SuperInox Satin Nickel

The satin finish offers full expression to the refined colour of nickel. It exalts and makes more precious the shapes of the handle to which it is applied. The finish has a 30-year anti tarnish sea air guarantee.

IS_SuperIniox Satin Stainless

While this may look like traditional stainless steel, the surface hardness obtained with the VM process is far superior. Its elevated toughness makes this a high-tech finish, particularly suited to use on doors in high-traffic locations. The finish has a 30-year anti tarnish sea air guarantee.

ISC_SuperInox Satin Copper

SuperInox Satin Copper is an innovative and expressive superfinish, representing strength, character and an openness to the new. Suited for refined and sophisticated settings. The finish has a 10-year anti tarnish sea air guarantee.

ISBRZ_SuperInox Satin Bronze

This new Bronze colour of superfinish is innovative yet timeless. The allure of the past and the memory of its beauty are united with faith in the new and its projection into the future. The finish has a 10-year anti tarnish sea air guarantee.

IA_SuperInox Anthracite

This is a dark grey with metallic reflections, making for a very modern and exclusive finish. Its hardness is superior to chrome, and its aesthetics are suited to high-end and industrial settings. The finish has a 10-year anti tarnish sea air guarantee.

SuperInox finished hardware is guaranteed not to tarnish, pitt, tea stain, or fade in Sea Air.

Not even 316 marine grade Stainless Steel can provide this level of protection. 316 is stainless NOT stain free.

Finish Guide

All finishes shown in BLUE come with a 30-year anti tarnish guarantee (30yg)
All finishes shown in GREEN come with a 10-year anti tarnish guarantee (10yg)

Backplates & Roses

Olivari's **low horizontal backplates** are offered as an alternative to standard or low round and square roses.

Sitting behind the lever of your choice, roses and backplates add a unique aesthetic value to a project. All Olivari products are 100% made in Italy, and have been for over 100 years. The standard roses sit at 8mm high, whereas the low roses and low backplates are 5mm high. Both the roses and backplates are available in square or round to suit your chosen lever. Both the internal and external plates have fully concealed fixings, and are equipped with fully concealed spring and a horizontal stopper. As a result, the lever handle will always bounce back to its correct position after use.

Tested according to European standard "DIN EN 1906", the springs have successfully exceeded 200,000 working cycles, resulting in the 4th grade of classification - suitable for heavy use. In fact, the springs were successfully tested to in excess of 1,000,000 cycles.

Guilloché

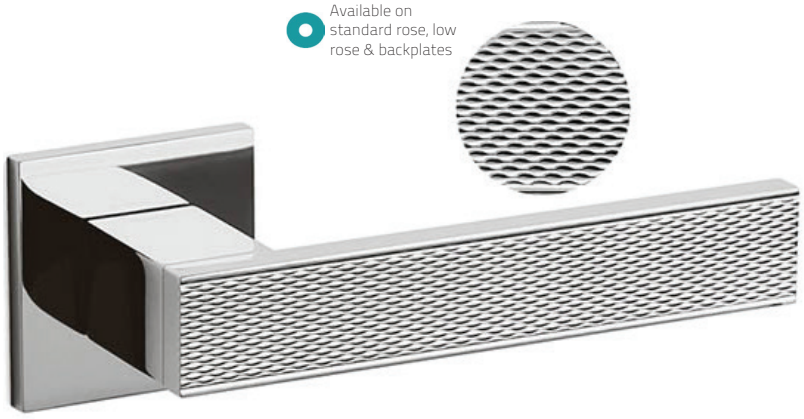

Il guilloché è una tecnica decorativa di incisione realizzata con apposite macchine che, guidate manualmente, generano un preciso, intricato e ripetitivo pattern sul materiale di base. A differenza dell'incisione tout court, realizzata a mano, che si presta a un decoro più libero e naturalistico, quella realizzata con le macchine à guillocher è tipicamente meccanica e ripetitiva, consente però di ottenere un'infinità di pattern differenti al variare dei parametri di lavorazione combinandosi alla sensibilità tecnica, ma anche estetica, dell'operatore. L'origine esatta delle prime macchine non è nota con certezza. È possibile che abbiano paternità svizzera, forse per opera di un ingegnere francese di nome Guillot. I primi esempi di casse di orologio lavorate con questa tecnica portano inciso l'anno 1624. L'effettiva introduzione nel settore dell'orologeria risale al 1786, quando Abraham-Louis Breguet inizia a utilizzarla per decorare i quadranti e le casse dei suoi orologi. Questa tecnica sperimenta una straordinaria popolarità nel XIX secolo, grazie soprattutto all'opera di Peter Carl Fabergé.

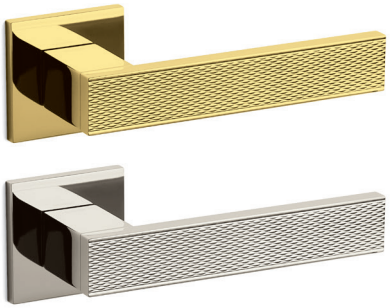

Guilloche is a decorative engraving technique that uses special lathes. Guided manually, these machines draw a precise, intricate, repeated pattern on the metal surface. Different to freehand engraving, which is suited to more naturalistic and free decorations, guilloche engraving is typically mechanical and reiterative. It allows for infinite different patterns by varying the parameters of the process, which work in concert with the technician's technical sensibility and aesthetic judgement. The exact origin of the first guilloche machines is uncertain, but perhaps they were Swiss or invented by a French engineer named Guillot. The first examples of its use are found on watch cases engraved with the year 1624. The definitive introduction of guilloche in watchmaking dates back to 1786, when Abraham-Louis Breguet began using it to decorate the dials and cases of his watches. In the 19th century, the technique became highly popular, largely thanks to the work of Peter Carl Fabergé.

Diana Barley - M1DBS

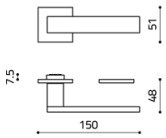

Studio Olivari 2016

Available on standard rose, low rose & backplates

Engraving similar to grains of barley with a shiny sophisticated allure. The Barley decoration is based on the classic grain motif of traditional guilloche engraving. The running, close-set pattern gives the handle shiny, sophisticated allure.
