For as long as we can remember we have been striving to create, design and build. Our conscious effort to better ourselves; willingness to take risks has separated us from the rest.

*"We look, we touch, we consider and we are inspired"*

Since 1911 the Olivari Family of Italy has also been inspired. Inspired to design, create, build and inspire others.

For over 100 years the brand Olivari has represented nothing but the best in architecturally inspired door hardware, and accessories. The relationship between design, form, function, aesthetics and practicality are all symbiotic.

The creation of a door handle is more than the door handle itself; it's the connection between its form and its function; its personality and its aesthetic appeal; its design and the environment. Quality & design are cultural; inspired by generations past.

The importance of the handle cannot be underestimated. It is an indispensable object; it can hinder one's advance or facilitate movement in spaces of everyday life. Without it, we would have to redefine our entire way of life.

Relevant is also the handle size. It is a small sculpture; a point of difference of visual attraction on surfaces that are all too often anonymous or redundant. The opening and closing of a door is a highly symbolic gesture which has not lost its meaning over time; taking design by the hand.

A key distinction of the Olivari name is the significant number of interpretations of the "design" concept. The modern handle lives somewhere in the middle of the equation; geometry and the organic; the practical and the inspired.

A handles' form is unique; a challenge to design and create. It represents personality and function in its' truest form. Inspired designs, their materialization and transformation into Olivari handles is evident in the number of designs which exist in the Olivari range.

Just as important is the story of their creation. A significant number of world renowned architects and designers have accepted Olivari's invitation to design the handle; to bring to life the balance between geometry and the organic.

*"Inspiration is true design.....embrace it"*

# SuperInox\_finishes

Guaranteed for up to **30 years** not to pit, rub, tarnish, fade or lose its lustre even in sea air & high usage environments.

Too often we see tarnished door hardware due to the ravages of time, constant usage or corrosive sea air. SuperInox was specifically developed by Olivari of Italy to combat this industry problem. Now a door handle can look as good in 30 years as it did when first installed. Olivari believes that things should last. A lost art in today's disposable world.

*Welcome to the world of SuperInox.*

Vacuum metallisation (VM) is an extremely high end technology treatment process habitually employed for tools used in high-velocity steel machining. It is applied to products that have already been chromed, in order to obtain maximum resistance to wear and tear. In fact, VM, the SuperInox process, increases the surface hardness of the plated product to three times that of traditional chromium plating. Since 2004 Olivari has been using this technology within its exclusive manufacturing facility located in Borgomanero Italy. An additional benefit of the VM process is its ability to offer metallic colours that cannot be produced within the traditional galvanisation process.

VM coating has exceptional performance in stability and longevity of the colour created, making the plated product last and last. If used in accordance with maintenance guidelines, SuperInox finished hardware in Brass, Satin Brass, Bright Nickel, Satin Nickel and Satin Stainless have a **30-year anti tarnish sea air guarantee**. Olivari SuperInox finished hardware in Polished Chrome, Satin Chrome, Satin Copper, Satin Bronze, and Anthracite have a **10-year anti tarnish sea air guarantee**.

## GALVANIC FINISHING

Galvanisation of the brass handle gives it a protective metal coat of nickel-chromium to guard against wear and corrosion.

## CR\_Polished Chrome

The handle is protected by a layer of chrome, forming an excellent barrier against weathering and offering great resistance to wear and tear. The bluish-silver colour and perfect shine make this finish particularly suitable for elegant settings. The finish has a 10-year anti tarnish sea air guarantee.

## SC\_Satin Chrome

The handle is protected by a layer of chrome, forming an excellent barrier against weathering and offering great resistance to wear and tear. The satin finish lends the handle a pleasant tactile quality. The chromed reflections carry a formal connotation suggesting use in modern settings. The finish has a 10-year anti tarnish sea air guarantee.

## EMB\_Electro Matt Black

The handle has a layer of matt black chrome. The satin black finish lends the handle a sophisticated quality. The satin black colour carries a progressive connotation suggesting use in a modern setting. EMB is a finish created with in Australia.

## BRZ\_Dark Bronze Dark (Waxed)

The handle has a layer of chemically treated bronze and wax, forming a living barrier against weathering. The dark rich bronze finish lends the handle a retrospective look and feel. The bronze reflections carry a traditional connotation suggesting use in traditional settings. As a living finish created within Australia, it's bronze colour changes over time and by production batch.

## SUPERINOX FINISHING

With SuperInox, a polished or satin-finish chrome handle is coated with an ulterior layer of metal (superfinishing) under high vacuum. Vacuum metallisation is extremely hard and durable. Nanocomposites of metal determine the specific colour of the surface and protect it from wear, scratches and aggressive substances such as humidity, sweat, salt spray, temperature swings and ultraviolet rays.

## IB\_SuperInox Brass

A practically eternal finish, for its pleasing looks as well as its durability. While the tonality is a prestigious one of rich brass, the qualities of endurance and toughness are the very elevated ones of Olivari SuperInox finishes. The finish has a 30-year anti tarnish sea air guarantee.

## ISB\_SuperInox Satin Brass

This combination between the classical softness of satin brass and the modernity of the SuperInox finish makes for durability and consistency of colour over time. The finish has a 30-year anti tarnish sea air guarantee.

## IBN\_SuperInox Bright Nickel

This shiny finish has a warm, elegant colour of nickel plus the advantages of remaining unaltered over time and not causing allergic reactions. Suitable for comfortable and sophisticated settings. The finish has a 30-year anti tarnish sea air guarantee.

## ISN\_SuperInox Satin Nickel

The satin finish offers full expression to the refined colour of nickel. It exalts and makes more precious the shapes of the handle to which it is applied. The finish has a 30-year anti tarnish sea air guarantee.

## IS\_SuperInox Satin Stainless

The colour is that of stainless steel, but the surface hardness obtained with the VM process is far superior. Its elevated toughness makes this a high-tech finish particularly suited to use on doors in high-traffic locations. The finish has a 30-year anti tarnish sea air guarantee.

## ISC\_SuperInox Satin Copper

This innovative and expressive superfinish represents a taste for strength, character and openness to the new. Suited for refined and sophisticated settings. The finish has a 10-year anti tarnish sea air guarantee.

## ISBRZ\_SuperInox Satin Bronze

This new colour of superfinish is innovative yet timeless. The allure of the past and the memory of its beauty are united with faith in the new and its projection into the future. The finish has a 10-year anti tarnish sea air guarantee.

## IA\_SuperInox Anthracite

This is a dark grey with metallic reflections, making for a very modern and exclusive finish. Its hardness is superior to chrome, and its aesthetics are suited to high-tech settings. The finish has a 10-year anti tarnish sea air guarantee.

*SuperInox finished hardware is guaranteed not to ....*

*Tarnish, Pitt, T Stain or Fade in Sea Air.*

*Not even 316 marine grade Stainless Steel can provide this level of protection.*

*316 is stainless not stainfree.*
