

2D Concealed BAC1080 Glass Functional Data

Y & Z Adjustable: Max 60kg Glass Door

Specifically designed to butt *glass doors* up against a wall or jamb, the BAC1080 2D full adjustable concealed patch plate hinge is rated to hold a 60kg glass door. It's revolutionary in it's design by combining a patch plate and invisible hinge together.

Not only can you adjust the position of the glass door in 2 dimensions (up down & left, right) but you can also take the door down without having to remove the hinge from its rebated housing in the door jamb.

Patch plate to wall... clean and sophisticated

Rated to carry a 60kg glass door to 90° or 180° opening, the hinge is extremely versatile and reliable, rated to 150,000 opening and closing cycles. Cost effective and highly functional, it is a real and

effective alternative to traditional and unsightly glass door hinges and pivot systems.

Quick release: Ceam's quick release system is revolutionary - once the hinge is installed, you never need touch the door or jamb again.

The hinge sits within a cup, the cup is rebated into jamb or directly into the wall, the hinge is then fastened to the cup. As a result, if the door needs to come down, all you do is unscrew the locking bolts and remove the hinge from the cup.

The door can be removed and reinstalled for painting and adjustments without damaging timber or paint work, saving time and money.

Door movement: over time, this can be an expensive problem to fix. Not with the BAC1080 2D fully adjustable hinge; it specifically caters for door movement.

Once movement occurs, a door may not close properly or rub the paintwork. To fix, the door needs to come down and then the door and/or jamb needs to be planed and repainted; a costly and time consuming effort.

Using the BAC1080, simply adjust the position of the door via the settings within the hinge. This adjustment is done without the door coming down.

RRP \$119.95 + GST per unit

BAC1080 Quick Facts

Min. glass thickness	8 -10mm
Max. door weight	60kg
Narrow rebate	21.5mm
