

BINK250| Single Sided Concealed Flush Pull

Designed as a invisible pull for cupboards and drawers fronts

The BINK250 concealed cupboard and drawer pull has been specifically designed to provide a clean, smooth contemporary look that is not interrupted by the visual appearance of traditional cabinet pulls or handles. Unlike traditional handles the BINK250 sits flush with the face of the cupboard and drawer, creating an aesthetically appealing appearance that is truly clean and elegant.

By using the veneer of the door or other material, and adhering it to the rectangular push plate you can achieve a fully blended pull that looks and acts as part of the cupboard or drawer. The BINK250 provides you with a beautifully clean solid cupboard and drawer face. Designed to be used in a horizontal or vertical position, the BINK250 is suitable for almost any opening and closing application.

The BINK250's beautiful contemporary look is achieved without compromising the functionality of the pull. The cavity that the BINK250 creates when pressing the faceplate in is 19mm deep, provides ample room for even the largest of hands. An additional benefit of the BINK250's clever design, you can grab the pull from any side or position of its rectangular shape. This feature is due to the unit using four (4) springs, not a single sided mechanism when pressing the faceplate in.

A clean wall - no handles

BINK250 | Single Sided Concealed Flush Pull - Technical Data

Designed for cupboard and drawer fronts

Like its bigger brother (the BINS range), the BINK250 is also designed by No-Ha of Belgium and made 100% in Europe by Bonaiti of Italy, is an ideal solution where you need a single sided flush pull. Made from industrial strength nylon and steel, the BINK250 is also a real winner.

Installation of the BINK250 is achieved via use of a custom 44mm milling tool. It cuts a hole on the inside of the cupboard or drawer specifically sized for the BINK250 to drop in. Using the BIZ44 milling tool (available for purchase or rental) fitting can be completed on site or in the factory.

With the added benefit of four independent steel springs fixed to the underside of the push plate, you can rest easy knowing it will always bounce back and sit flush with the face of the door.

The BINK250 comes with a 2-year manufacturer's guarantee.

BINK 250

Measurements :
