

BL010, 011, 014 | Bonaiti Magnetic Locks

Designed to provide a seamless door to wall locking

Bonaiti of Italy magnetic lock range, the BL010, BL011 & BL014 are ideal for internal doors that provide low to mid level security. Doors such as passage doors, bathroom, WC, office and study doors to name a few. The latching and locking mechanism is now incorporated into the steel constructed body. Used extensively throughout Europe these locks have been warmly received in Australia and New Zealand with an extensive install base.

BL010 Magnetic Cylinder Lock

Ideal for those doors that you would use a key lock on. Capable of using all industry standard European cylinders, the BL010 is a 50mm back set mortice lock with holes designed to cater for door hardware that uses normal tie through bolts.

BL011 Magnetic Privacy Lock

The same as the BL010 magnetic lock except it has provision for a separate Privacy Turn and eRelease. Using a snib and eRelease is ideal for a WC type door rather than using a key for privacy.

BL014 Narrow Style Magnetic Cylinder Lock

The BL014 is the narrow style version of the successful BL010 Magnetic Lock. With a 30mm backset, it is a simple, sophisticated option when an internal narrow locking option is needed without losing out on the functionality of its predecessors.

Aesthetics

There is no visible striker plate when the door is closed. As a result you have a clean door & jamb. When the door is open, there is no unsightly latch tongue protruding from the edge of the door to catch your clothes on - a clean look.

Functionality

To open the door, all you do is pull the lever down as per any standard latch. To unlock the door, use either the key or a turn snib.

Protruding latch tongue and striker plate

There is no chance of catching clothes or arms on protruding latch tongues & striker plates as they do not exist.

Wide door jambs

There is now no longer any need for wide, custom made striker plates. The tongue only engages when the magnetism of both the latch and striker meet when the door is in the closed position.

Reliability

Because the tongue engages due to the magnetic attraction to the cup in the striker plate (and not due to moving and mechanical parts). Tested to over 400,000 cycles.

Heavy Spring

The inbuilt heavy duty spring in these locks, make them ideal for long term use with any unsprung lever set or poorly sprung handles. The heavy spring will ensure that handle does not droop over time and will always bounce back to the correct horizontal position.

Magnetic Latch Ordering Codes

BL010 (finish) - Magnetic Cylinder lock 50mm Back Set
 BL011 (finish) - Magnetic Privacy lock 50mm Back Set
 BL014 (finish) - Magnetic Narrow cylinder lock 30mm B/S
