

# LOCKING AND LATCHING MECHANISM IN ONE UNIT

# Magnetic Locks & Latches

## BL010 Magnetic Lock BL011 Magnetic Privacy Lock

### Key Features

The patented magnetic lock (BL010/BL011) is suitable for locking low to mid level security internal doors (eg. passage doors & bathroom, office, study), the latching and locking mechanism is now incorporated into one steel constructed body.

#### aesthetics

There is no visible striker plate when the door is closed. As a result you have a clean door & jamb. When the door is open, there is no unsightly latch tongue protruding from the edge of the door to catch your clothes on – a clean look.

#### functionality

To open the door, all you do is pull the lever down as per any standard latch. To unlock the door, use either a key or a turn snib.

#### protruding latch tongue and striker plate

There is no chance of catching clothes or arms on protruding latch tongues & striker plates as they do not exist with the BL010/BL011.

#### noise

The latching mechanism is silent due to it being magnetic. There is no latch tongue to hit the striker when closing or opening the door.

#### wide door jambs

There is now no longer any need for wide, custom made striker plates. The BL010/BL011 tongue only engages when the magnetism of both the latch and striker meet iwhen the door is in the closed position.

#### reliability

Because the tongue engages due to the magnetic attraction to the cup in the striker plate (and not due to moving and mechanical parts), it will, for all intents and purposes, never fail. Tested to over 400,000 cycles – totally reliable.

#### heavy spring

The BL010/BL011 are both heavy sprung locks, making them ideal for long term use with any unsprung lever set or poorly sprung handles. The heavy springs will ensue that handle does not droop over time and will always bounce back to the correct horizontal position.

## BL010 & BL011

#### available finish

SC satin chrome  
CR polished chrome  
PB polished brass

#### snib compatibility

snibs using 6mm square bar

#### back set hub

50mm

#### specification code & finish

patented magnetic lock  
BL010 - finish

patented magnetic privacy lock

BL011 - finish

LOCKING AND LATCHING  
MECHANISM IN ONE UNIT

BL010 – with Euro cylinder

BL010 – with privacy snib facility

#### Quick Facts

|                          |  |
|--------------------------|--|
| Compatibility            | Standard Australian & European door hardware |
| Snib Compatibility       | Snibs using 6mm square bar                   |
| Back Set Hub             | 50mm   |
| Visible Striker Plate    | No   |
| Visible Latch Tongue     | No   |
