

BL002 MAGNETIC PRIVACY LATCH FITTING INSTRUCTIONS

A = 60mm
 B = 90mm
 C = 17.5mm

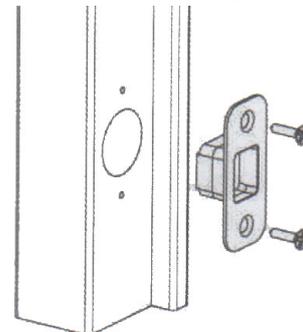

Latch Installation

- 1 Mark a centre line on the door and the doorframe in the position of where the magnetic latch is to be fitted.
- 2 Drill a hole 25mm diameter by 95mm deep at 90 degrees to the surface in the centre of the end of the door in the position previously marked.
- 3 On the front of the door, drill two holes, one a 15mm diameter hole 60mm in from the edge of the door along the centre line, the second a 7mm diameter hole 42.5mm in from the edge of the door along the centre line.
- 4 Using the strike, remove the magnetic catch from the latch. Centre the "privacy" block with the latch axis to allow its insertion into the door cavity

Striker Installation

- 5 Insert latch and faceplate squarely and mark around the faceplate. Remove latch and chisel out a recess 2.8mm deep for the latch faceplate to rebate into to give a level surface finish.
- 6 Insert latch and faceplate into position and secure with the two screws (6G x 25mm) supplied.
- 7 Align and mark the position on the doorframe where the latch strike is to be fitted. Chisel out and recess the strike plate 1.5mm to give a level surface
- 8 Insert the strike plate and secure with the two screws (6G x 25mm) supplied
- 9 Fit door hardware as per manufacturers instructions.

Suitable for Timber and Steel Framed Doors & Jambs
