

Beautiful right down to the smallest detail; a sliding door that disappears completely into the wall.

A type of sliding door installed so as to allow the end of the door to be concealed. Even when the sliding door has been opened completely, it may be grasped and pulled out. Because it is unnecessary to leave the handle part of the sliding door exposed, the neat impression of a completely flat door opening is obtained, ensuring an even wider opening. The fixing screws are behind an accessory plate providing a seamless finish. This is suitable for making high-grade details in spaces such as luxury hotels.

Model T2940

# SMALL ENTRY PULLS *by Elmes of Japan*
