

An implementation of the often required "two-point-support," with an exceptional length of 3000mm.

Using thin Stainless Steel pipes, a square type with a crisp impression and a round type with a gentle impression are available. A two-point fixing design without an intermediate support, it neatly fits to the door. The thickness of the round type is 3mm, giving a firm resistance. The bulge is for ease of grasp, as well as increasing strength.

FEATURED MODELS *by Elmes of Japan*

Up to 3000mm in length

T2970

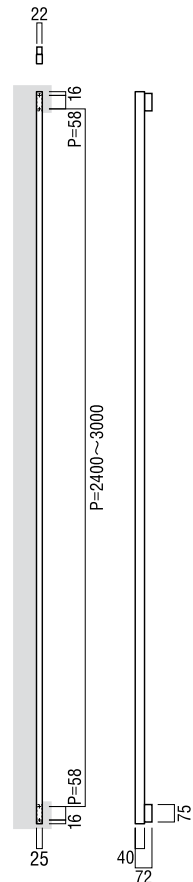

base material
