## LOW HORIZONTAL PLATE

*The low 5mm projection horizontal plate was designed as an alternative to the round or square rose that sits behind the lever.*

*The aesthetic value being a sort of backdrop; an extension of the door handle, it creates the effect of one whole integrated piece, with strong expression and substance.*

*With the aim of allowing the use of the horizontal plate with most Olivari door handles, two versions are available: a rectangular one and an oval one (162 x 51 x 5mm).*

*Both are equipped with an independent very strong return spring and a horizontal stop position; in order to always bring the door handle back to its correct position after use.*

*Stringently tested according to the resistance test (DIN EN 1906), the independent springs exceeded 200,000 cycles, resulting in the 4th grade of classification designating them as suitable for heavy use environments. In fact, the test was extended up to 1,000,000 cycles, which was easily exceeded. Both versions are available in all the finishes listed in the catalogue.*

# SuperInox finishes: Guaranteed for up to 30 years not to pit, rub, tarnish, fade or lose its lustre even in sea air & high usage environments.

Too often we see tarnished door hardware due to the ravages of time, constant usage or corrosive sea air: SuperInox was specifically developed by Olivari of Italy to combat this industry problem. Now a door handle can look as good in 30 years as it did when first installed. Olivari believes that things should last. A lost art in today's disposable world.

## Welcome to the world of SuperInox

Vacuum metallisation (VM) is an extremely high end technology treatment process habitually employed for tools used in high-velocity steel machining. It is applied to products that have already been chromed, in order to obtain maximum resistance to wear and tear. In fact, VM, the SuperInox process, increases the surface hardness of the plated product to three times that of traditional chromium plating. Since 2004, Olivari has been using this technology within its exclusive manufacturing facility located in Borgomanero Italy. An additional benefit of the VM process is its ability to offer metallic colours that cannot be produced within the traditional galvanisation process.

VM coating has exceptional performance in stability and longevity of the colour created, making the plated product last and last. If used in accordance with maintenance guidelines, SuperInox finished hardware in Brass, Satin Brass, Bright Nickel, Satin Nickel and Satin Stainless have a **30-year anti tarnish sea air guarantee**. Olivari SuperInox finished hardware in Polished Chrome, Satin Chrome, Satin Copper, Satin Bronze, and Anthracite have a **10-year anti tarnish sea air guarantee**.

### GALVANIC FINISHING

The handle is protected by a layer of chrome, offering an excellent barrier against weathering and offering great resistance to wear and tear. The blue-silver colour and perfect shine make this finish particularly suitable for elegant settings. The finish has a 10-year anti tarnish sea air guarantee.

### CR\_Polished Chrome

The handle is protected by a layer of chrome, offering an excellent barrier against weathering and offering great resistance to wear and tear. The blue-silver colour and perfect shine make this finish particularly suitable for elegant settings. The finish has a 10-year anti tarnish sea air guarantee.

### SUPERINOX FINISHING

With SuperInox, a polished or satin-finish chrome handle is coated with an ulterior layer of metal (superfinishing) under high vacuum. Vacuum metallisation is extremely hard and durable. Nanocomposites of metal determine the specific colour of the surface and protect it from wear, scratches and aggressive substances such as humidity, sweat, salt spray, temperature swings and ultraviolet rays.

### IB\_SuperInox Brass

A practically eternal finish, for its pleasing looks as well as its durability. While the tonality is a prestigious one of rich brass, the qualities of endurance and toughness are the very elevated ones of Olivari SuperInox finishes. The finish has a 30-year anti tarnish sea air guarantee.

### EMB\_Electro Matt Black

The handle has a layer of matt black chrome. The satin black finish lends the handle a sophisticated quality. The satin black colour carries a progressive connotation suggesting use in a modern setting. EMB is an Australian finish.

### ISB\_SuperInox Satin Brass

This combination of the classical softness of satin brass and the modernity of the SuperInox finish makes for durability and consistency of colour over time. The finish has a 30-year anti tarnish sea air guarantee.

### IBN\_SuperInox Bright Nickel

This shiny finish has a warm, elegant colour of nickel plus the advantages of remaining unaltered over time and not causing allergic reactions. Suitable for comfortable and sophisticated settings. The finish has a 30-year anti tarnish sea air guarantee.

### ISN\_SuperInox Satin Nickel

The satin finish offers full expression to the refined colour of nickel. It exalts and makes more precious the shapes of the handle to which it is applied. The finish has a 30-year anti tarnish sea air guarantee.

### IS\_SuperInox Satin Stainless

The colour is that of stainless steel, but the surface hardness obtained with the VM process is far superior. Its elevated toughness makes this a high-tech finish particularly suited to use on doors in high-traffic locations. The finish has a 30-year anti tarnish sea air guarantee.

### ISC\_SuperInox Satin Copper

This innovative and expressive superfinish represents a taste for strength, character and openness to the new. Suited for refined and sophisticated settings. The finish has a 10-year anti tarnish sea air guarantee.

### ISBRZ\_SuperInox Satin Bronze

This new colour of superfinish is innovative yet timeless. The allure of the past and the memory of its beauty are united with faith in the new and its projection into the future. The finish has a 10-year anti tarnish sea air guarantee.

### IA\_SuperInox Anthracite

This is a dark grey with metallic reflections, making for a very modern and exclusive finish. Its hardness is superior to chrome, and its aesthetics are suited to high-tech settings. The finish has a 10-year anti tarnish sea air guarantee.

**SuperInox finished hardware is guaranteed not to ... Tarnish, Pit, T Stain, Rub Off or Fade in Sea Air.**

**Not even 316 marine grade Stainless Steel can provide this level of protection.**

**316 is stainLESS not stainFREE.**

**Galvanic finishes**

CR - Polished Chrome
