# 3D Concealed Hinge BAC1430 Functional Data

Fully Adjustable: Max 75kg (based on door 2040 x 920mm)

The BAC1430 3D adjustable concealed hinge is revolutionary in its design and is rated to carry a 80kg door to 180° opening aperture.

**A blended door to wall look and feel:** once closed, the BAC1430 hinge becomes invisible, hidden away by the jamb and the door butting up against each other.

Walls no longer need to be visually interrupted by the traditional butt hinge where the two leaves of the hinge meet and protrude out past the jamb.

The formal architectural composition of a wall can now continue without interruption, creating an aesthetically appealing appearance that is truly clean and elegant.

**NEW 3D fully adjustable Concealed Hinge now available in white. Solid Colour Including the knuckle.**

**Quick release:** CEAM's quick release system is revolutionary - once the hinge is installed, you never need touch the door or jamb again.

The hinge sits within a cup, the cup is rebated and fixed to the door and jamb, the hinge is then fastened to the cup. As a result, if the door needs to come down, all you do is unscrew the locking bolts and remove the hinge from the cup.

The door can be removed and reinstalled for painting and adjustments without damaging timber or paint work, saving time and money.

**Door movement:** over time, this can be an expensive problem to fix. Not with the BAC1430 3D adjustable hinge; it specifically caters for door movement.

Once movement occurs, a door may not close properly or rub the paintwork. To fix, the door needs to come down and then the door and/or jamb needs to be planed and repainted; a costly and time consuming effort.

Using the BAC1430, simply adjust the position of the door via the settings within the hinge. This adjustment is done without the door coming down.
