

FritsJurgens®

CABLE GROMMET

The pivot hinge systems by FritsJurgens stand out because they are fully integrated in the door. The cable grommet in the top pivot makes it possible to integrate cables in the door, invisibly. Hidden perfection as you can expect from FritsJurgens.

The Cable Grommet is an addition to the existing FritsJurgens top pivot range and enables wiring in the door. This top pivot contains an integrated cable grommet of $\varnothing 7.5$ mm. This version is available with every FritsJurgens system and replaces the standard delivered top pivot and ceiling plate within a complete set.

TOP PIVOT WITH CABLE ENTRY

| CABLE THICKNESS | DOOR SEAM |
|----------------------------|-----------|
| $\varnothing 5.0\text{mm}$ | 8.0mm |
| 3.5 x 2mm | 5.0mm |

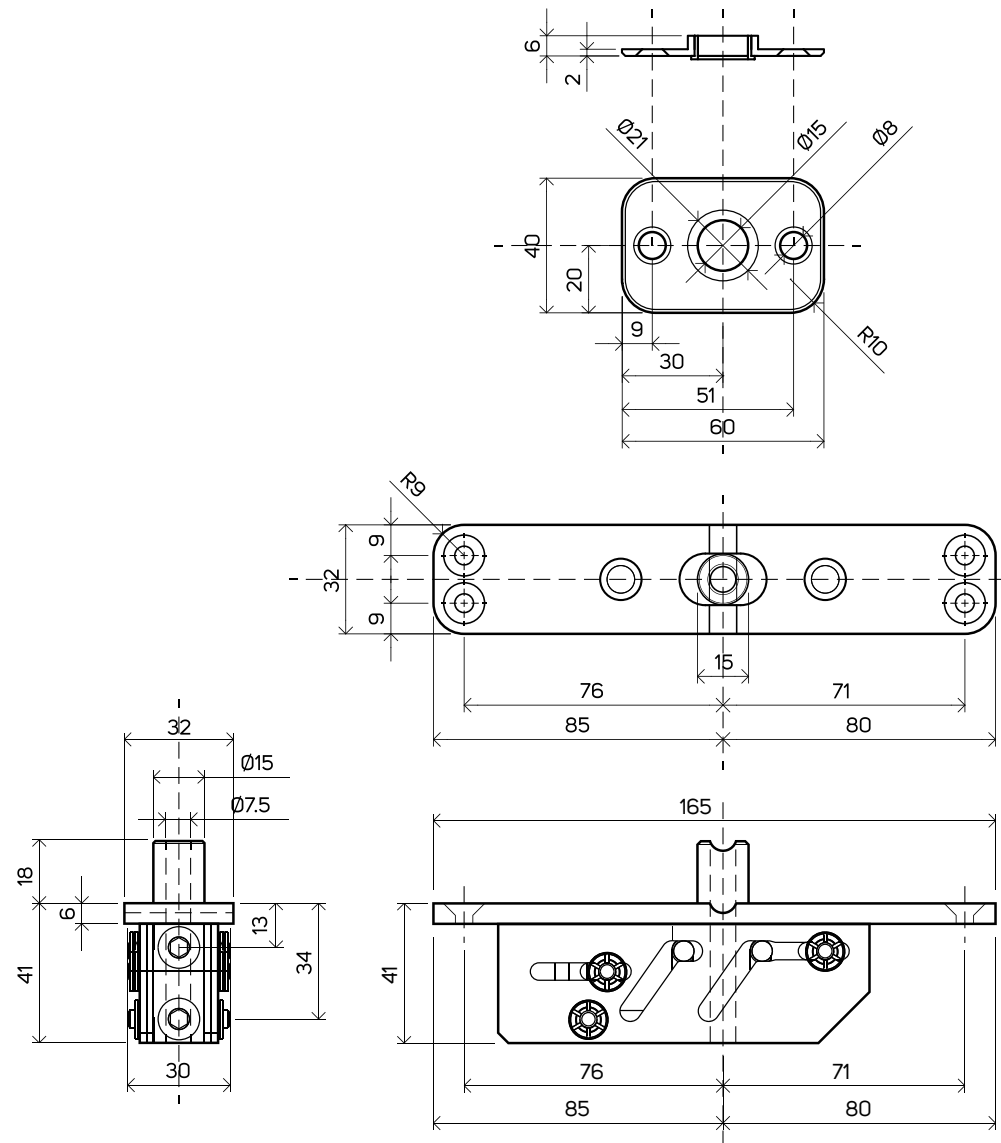

| CABLE THICKNESS | DOOR SEAM |
|--|-----------|
| $\varnothing 7.0\text{mm}$ | 4.0mm |
| *WHEN DOOR IS MOUNTED BUT STILL ACCESSIBLE | |

FritsJurgens®

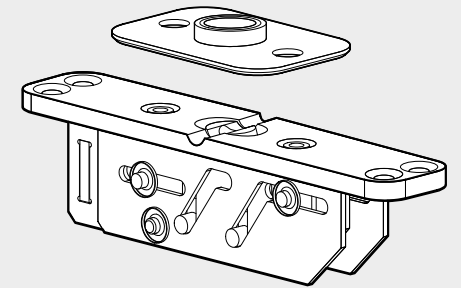

CABLE GROMMET

The top pivot with cable grommet is suitable for every cable with a diameter up to 5.0 mm or 7.0 mm when the door is installed. The cable grommet can be used for electric security, lighting in the door, et cetera.
