Edge Ledge pulls by Didheya of Spain

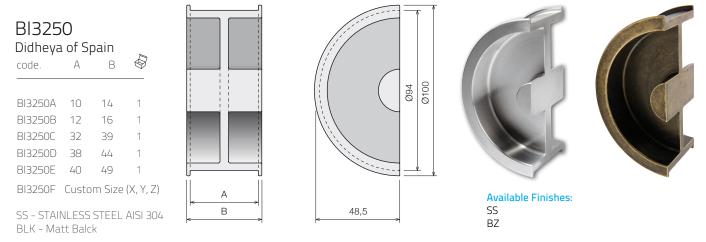

Six millimeters thick and in multiple designs. The Edge range from Didheya of Spain is innovative, simple, practical and easy to install. Designed for sliding timber or glass doors in constant use, the Edge range is clean and visually different and appealing.

This is a clear example of pragmatism resolved in a Stainless Steel AISI 304 thick element.

STAINLESS STEEL AISI 304

BINS | Concealed Flush Pull Range Designed for sliding doors that fully recess into pockets

The BINS range of concealed sliding door flush pulls have been specifically designed to provide a clean smooth contemporary look that is not interrupted by the visual appearance of traditional flush pulls or handles. Unlike traditional sliding door hardware, the BINS range sits flush with the face of the door; as a result the door will fully recess into the sliding door cavity.

Using the BINS range, the formal architectural composition of a door can now continue without interruption of a noticeable handle, creating an aesthetically minimalistic truly clean door.

More and more, tolerance in cavity sliders are becoming smaller & smaller, you can achieve a flawless blend by using the veneer of the door and adhering it to the rectangular push plate. This allows the flush pull to disappear into the door providing you with a beautifully clean solid door face.

The BINS range's beautiful contemporary look is achieved without compromising the functionality of the flush pull. The cavity, created when pressing the faceplate in, ranges from a minimum of 32mm through to 43mm deep based on door thickness, providing ample room from either side of the door.

An additional benefit of the BINS clever design; you can grab the flush pull from any side or position of its rectangular shape. This feature is due to the unit using four (4) springs, not a mechanism when pressing the face plate in.

BINS| Concealed Flush Pull Range - Technical Data Designed for sliding doors that fully recess into pockets

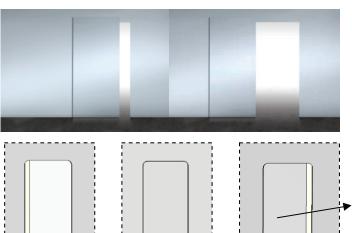

Desgined by No-Ha of Belgium and made 100% in Europe by Bonaiti of Italy, the BINS range of concealed flush pulls are made from industrial strength nylon and steel. The BINS range has shown to be a real winner in terms of reliability, functionality and aesthetic appeal.

Suitable for doors from 38mm to 50mm thick for double sided, 27 - 38mm for single sided; installation of the BINS range is achieved via use of a custom 44mm milling tool, by routing a hole in the door specifically sized for

the units to drop in. There is no need for the door to be pulled apart, or to remove the face of the door. Using the BIZ44 milling tool *(available for purchase or rental)* fitting can be completed on site or in the factory.

With the added benefit of four independent steel springs fixed to the underside of each push plate, you can rest easy knowing it will always bounce back and sit flush with the face of the door.

The BINS range comes with a 2-year manufacturer's guarantee.

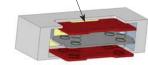

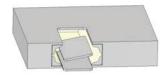

Measurements:

- Opening: 87mm x 45mm
- Cover plate: 85.5mm x 43.5mm
 Note: The MDF or other material cover plate is made to match the surface finish of the door and is adhered to the face plate of

BINS range mechanism. (purchased separately)

BINK250 | Single Sided Concealed Flush Pull Designed as a invisible pull for cupboards and drawers fronts

The BINK250 concealed cupboard and drawer pull has been specifically designed to provide a clean, smooth contemporary look that is not interrupted by the visual appearance of traditional cabinet pulls or handles. Unlike traditional handles the BINK250 sits flush with the face of the cupboard and drawer, creating an aesthetically appealing appearance that is truly clean and elegant.

By using the veneer of the door or other material, and adhering it to the rectangular push plate you can achieve a fully blended pull that looks and acts as part of the cupboard or drawer. The BINK250 provides you with a beautifully clean solid cupboard and drawer face. Designed to be used in a horizontal or vertical position, the BINK250 is suitable for almost any opening and closing application.

The BINK250's beautiful contemporary look is achieved without compromising the functionality of the pull. The cavity that the BINK250 creates when pressing the faceplate in is 19mm deep, provides ample room for even the largest of hands. An additional benefit of the BINK250's clever design, you can grab the pull from any side or position of its rectangular shape. This feature is due to the unit using four (4) springs, not a single sided mechanism when pressing the faceplate in.

BINK250| Single Sided Concealed Flush Pull - Technical Data Designed for cupboard and drawer fronts

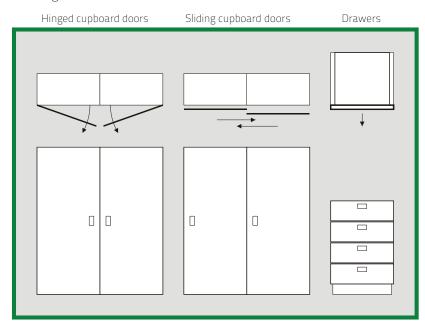

Like its bigger brother (the BINS range), the BINK250 is also desgined by No-Ha of Belgium and made 100% in Europe by Bonaiti of Italy, is an ideal soultionwhere you need a slingle sided flush pull. Made from industrial strength nylon and steel, the BINK250 is also a real winner.

Installation of the BINK250 is achieved via use of a custom 44mm milling tool. It cuts a hole on the inside of the cupboard or drawer specifically sized for the BINK250 to drop in. Using the BIZ44 milling tool (available for purchase or rental) fitting can be completed on site or in the factory.

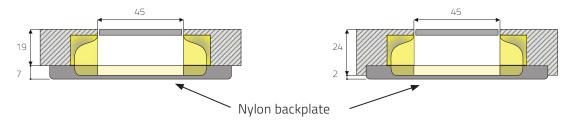

With the added benefit of four independent steel springs fixed to the underside of the push plate, you can rest easy knowing it will always bounce back and sit flush with the face of the door.

The BINK250 comes with a 2-year manufacturer's guarantee.

BIZ44 | Milling Tool - Technical Data Designed for the BL004 & BL005, BINS & BINK range of concealed flush pulls

No longer is it a costly, difficult and time consuming process to fit-off rebated hardware. Not when you have the correct tool for the job.

Specifically made for the installation of the No-Ha invisible range of products, the BIZ44 milling tool makes the installation process a breeze. No more chiselling or chipping the timber; the BIZ44 is specific to the requirement.

The BIZ44 cuts a hole in the timber door and/or face of the cupboard or drawer specifically sized for the BINS200 and BINK250 to drop in. Using the BIZ44 milling tool (available for purchase or rental) fitting can be completed on site or in the factory.

With the added benefit of four independent cutting edges, the BIZ44 has been made with multiple uses in mind.

Used throughout Europe to achieve a blended look, the No-Ha range of concealed handles meets todays minimalistic look and feel of modern architecture and Interior design.

Now being used in residential and commercial projects throughout Australia and New Zealand.
